```sql
USE MyGuitarShop;

--Returning EmailAddress, OrderID, OrderDate
SELECT
    c.EmailAddress,
    o.OrderID,
    o.OrderDate
FROM Customers c
JOIN Orders o ON c.CustomerID = o.CustomerID -- Joining with Orders
table with CustomerID
-- Correlation subquery
WHERE o.OrderDate = -- Condition: filtering the row where o.OrderDate
matches the minimum o2.OrderDate.
(
    SELECT MIN(o2.OrderDate) -- returing the minimum/oldest date of
each customer.
    FROM Orders o2 -- joining with the Orders table and set as o2
    WHERE o2.CustomerID = c.CustomerID -- it references the
`c.CustomerID` from the main query & we're find the MIN(OrderDate) of
EACH CUSTOMER.
);
```
